Introducing the Next Level: Dipper POCT Single Dip Urinalysis Control Now Featuring Barcode Integration.

Redondo Beach, CA – Quantimetrix today announced the integration of barcodes for each single-use Dipper POCT Urinalysis Dipstick Control pouch. Dipper POCT is a revolutionary single-use liquid control with extraordinary room temperature stability of 3 months and 3 years refrigerated from date of manufacture. Made with a simulated human urine matrix, Dipper POCT's stability exceeds that of all other urinalysis controls, currently on the market, formulated with native ketones.

Integrating the barcodes on each pouch will reduce errors that can arise from manual entry of lot numbers and expiration dates. This streamlined workflow will speed up the process, creating seamless testing for every environment including central labs, reference labs, nursing stations, and doctors' offices.

Dipper POCT is available in two convenient configurations Level 1&2 / 62 x 1.5 mL, and Level 1&2 / 20 x 1.5 mL. Contact: sales@quantimetrix.com to learn more.

About Quantimetrix
