Quantimetrix Launches Lipoprint LDL and HDL Subfraction Testing Service for Research Community.

Quantimetrix, a leading provider of innovative testing solutions, is pleased to announce the launch of Lipoprint as a service for researchers who are interested in quantifying LDL & HDL subfractions, democratizing lipid profiling for research studies involving humans and various animal species.

“Our Lipoprint LDL and HDL Subfraction Testing Service represents a significant advancement in lipid profiling,” stated a spokesperson from Quantimetrix. “By empowering researchers with the ability to quantify specific LDL and HDL subfractions, we empower them to gain deeper insight into cardiovascular health, metabolic disorders, and the efficacy of therapeutic interventions.” Key features of Lipoprint LDL and HDL Subfraction Testing Service include:

- **Quantification:** Accurate measurement of LDL and HDL subfractions provides researchers with detailed information on lipoprotein composition and function.
- **Range:** Suitable for human and a variety of animal species.
- **Reporting:** Test results are sent via email within seven business days.
